

RETIZIN®

Dietary supplement with Plant extracts, Vitamins and Minerals.

RETIZIN® is a dietary supplement made of Turmeric (Cureit®), homotaurine, lutein (from FloraGLO®), vitamins and minerals recommended in case of reduced supply with the diet or increased needs. An unvaried and unbalanced diet, together with unhealthy lifestyle choices or increased personal needs, can result in an inadequate intake of components or a non-physiological level of substances that contribute to the protection of cells against oxidative stress.

Curcuma- Cureit®

Curcuma Longa extract, thanks to its antioxidant capacity, contributes to the protection of cells against oxidative stress. Cureit® is a formulation of Curcuma Longa extract which, in the studies carried out, has shown a significantly higher absorption than standard turmeric formulations.

Homotaurine

Homotaurine is a synthetic amino acid derivative, existing in nature in particular species of algae.

Lutein and Zeaxanthin

They are molecules called carotenoids, which accumulate in the central part of the retina, the macula lutea. The Tagetes erecta extract titrated in lutein contributes to eyesight well-being.

Folic acid

Folic acid is a water-soluble B group vitamin, useful for normal homocysteine metabolism; it also intervenes in the processes of cell division and contributes to normal psychological function.

Vitamin C and Vitamin E

Vitamins C and E protect the cells against oxidative stress.

Vitamin D3

Vitamin D3 intervenes in the process of cell division.

Copper - Zinc

Copper and zinc are minerals which contribute to the protection of cells against oxidative damage; moreover, copper is useful for the physiological metabolism of energy and zinc contributes to maintain normal vision.

Usage

We recommend one tablet per day, to be swallowed whole with a sip of water.

Warnings

Supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Do not exceed the daily recommended dose. Keep out of reach of children under three years. Product for adults. In case of liver function changes, biliary or gallbladder stones, the use of the product is not recommended. If you are taking drugs, you should consult a doctor. Do not take in case of hypersensitivity or allergies to one or more components.

Storage

Store in a cool and dry place, away from light and / or heat sources. The minimum shelf life refers to the product properly stored, in undamaged packaging.

Format

Package with 28 swallowable gastro-resistant GLUTEN FREE tablets.
