

IMMUNODROP

S A K E I

PROTECTIVE OPHTHALMIC
SOLUTION OF THE
OCULAR SURFACE

8 ml

The tear film, in addition to lubrication, helps to modulate the inflammatory response of the ocular surface, favouring repair processes and maintaining or restoring structural integrity. It also plays a crucial role in the natural antimicrobial defences of the eye, constituting a physiological protective barrier against environmental bacteria and counteracting the potential development of both gram-positive and gram-negative bacteria.

An optimal condition of the ocular surface therefore favours a correct inflammatory response and innate and adaptive immunity, as well as contribute to the protection of the ocular surface against pathogenic bacteria.

Immunodrop is a medical device useful to protect and stabilise the ocular surface, particularly indicated in case of symptoms derived from alteration of the tear film, such as red eye, eye irritated by external agents or dry eye.

The clinical benefits of **Immunodrop** are due to the fact that the individual components, through a tear film reconstruction process and increased adhesion of the positive bacteria naturally present on the ocular surface, stabilise the tear film and restore the natural protective barrier against external microbial agents, pollutants and environmental substances.

Immunodrop is also useful for restoring the normal equilibrium of the tear film, which is altered during or following infections (conjunctivitis, blepharitis, blepharoconjunctivitis and sty), even recurrent, and after eye surgery.

The **Immunodrop** bottle is fitted with a technological system that enables the product to be preserved without the use of preservatives. The absence of preservatives further prevents irritation of the ocular surface.

Usage

Instill one or two drops in each eye 3-4 times a day or as advised by your doctor.
The product can be used while wearing contact lenses

Composition

Phospholipid mixture from bacterial lysate of *Lactobacillus sakei* at 4%, Hydroxypropyl methylcellulose, Boric acid, Sodium chloride, Purified water.

Warnings

- Wash your hands thoroughly before using the product
- Do not use the product if you are allergic or have known hypersensitivity to any of the components
- Do not use the product in case of known incompatibility with even a single component of the formulation
- Close the bottle tightly after use
- Do not use the product after 28 days from opening it
- Do not use the product after the expiry date indicated on the bottle
- Keep out the reach of children
- Do not swallow
- Do not use the product if the package does not appear intact
- In case of adverse reactions, stop using the product and consult your doctor
- Pay attention that the tip of the bottle does not come into contact with the eye
- Store at room temperature (5-25°C) away from sunlight and heat sources.
