LUMIXA®

ANTIOXIDANT LUBRICANT AND
PHOTOPROTECTIVE OPHTHALMIC SOLUTION
PRESERVATIVE-FREE

10 ml

LUMIXA® is a preservative-free antioxidant, lubricant and photoprotective ophtalmic solution based on cross-linked hyaluronic acid sodium salt, liposomes and crocin.

Cross-linked sodium hyaluronate is a reticulated form of sodium hyaluronate produced to obtain a more viscoelastic and stable molecule. Cross-linked sodium hyaluronate ensures better hydration and longer permanence on the ocular surface.

Thanks to the synergy between cross-linked sodium hyaluronate and liposomes, **LUMIXA®** is suitable for all types of ocular dryness caused by lacrimal hyposecretion (insufficient production of tear film) or dry eye syndrome (excessive evaporation of the tear film).
Crocin is a carotenoid that interacts with light radiation at wavelengths between 380 and 500 nm; this photoprotective property, and its antioxidant capacity, makes Lumixa effective even in dry eyes caused by prolonged use of electronic devices (computers, mobile phones, tablets, etc.). In fact, the blue light emitted by these devices represents a portion of the visible light spectrum between 380 and 500 nm that can cause oxidative damage on the ocular surface, which manifests itself with dry eye and inflammation.

LUMIXA helps protect the ocular surface and ocular tissues:
- from free radicals produced in case of dry eyes;
- from the consequences of high exposure to devices that emit radiation that cause visual stress (eg blue light from prolonged use of computers, smartphones, tablets), unfavorable lighting conditions, etc ;
- in case of mechanical stress (ophthalmological diagnostic and surgical procedures, eye trauma) and / or environmental stress (air conditioning, dry or polluted air, high ambient temperatures, etc.).

Indications

Symptomatic treatment of dry eye syndrome.
Also indicated for corneal protection as a tear substitute in case of visual stress also due to the harmful consequences of blue light, environmental stress, or after surgery, ocular trauma

How to use

Instil one or two drops in each eye, one or more times a day or as advised by your doctor.
The product can be used when wearing contact lenses.

Composition

0.15% cross-linked hyaluronic acid sodium salt, liposomes, crocin, edetate sodium, buffered isotonic solution pH 7.2 in 100 ml.

Warnings

- Wash your hands thoroughly before using the product.
- Do not use the product if you are allergic or have a known hypersensitivity to any of the components.
- Close the bottle tightly after use.
- Use or discard the product within 60 days after opening
- Do not use the product after the expiry date indicated on the bottle.
- Store the product at a temperature between 8 and 25 ° C.
- Keep out of the reach of children
- Do not ingest.
- Do not use the product if the packaging does not appear intact.
- In case of adverse reaction, discontinue use and consult your doctor.
- Make sure that the tip of the bottle does not come in contact with the eye.
- Administer the product at least 5 minutes apart from the administration of other products for topical ophthalmic use.
