

Protective and Lubricating
OPHTHALMIC SOLUTION
for adults and children

8 ml

OZODROP® is a protective, lubricating, moisturising and soothing ophthalmic solution for the ocular surface, with LipozonEye (ozonated vegetable oil, soy phospholipids) and hypromellose, useful for:

- protection before and after eye surgery
- the treatment of symptoms related to inflammation, also of infectious origin
- promoting restorative processes after traumatic or surgical stress
- the treatment of dry eye, including irritation caused by environmental conditions or mechanical stress, such as wearing contact lenses.

Thanks to its ozonated oil and liposomes, **OZODROP®** reduces the ability of bacteria to form a biofilm and promotes their breakdown. The biofilm is a natural defence mechanism that bacteria put in place, which can form on the ocular surface, especially in the case of abrasions and trauma, or on contact lenses. Removing the biofilm creates an unfavourable environment for the proliferation of bacteria, making them more susceptible to both the eye's natural defences and to antibiotics, which reduces inflammatory symptoms caused by bacteria.

Vegetable oil and liposomes support the stabilisation of the lipid layer of the tear film, reducing the evaporation of the aqueous layer and ensuring immediate relief for eyes. The vegetable oil used is ozonated and therefore self-preserved, it is made more bioavailable and biotolerable by the insertion into liposomes.

Indications

OZODROP® is indicated as support:

- as part of prophylaxis before and after surgery (e.g., cataracts, intravitreal injections, etc.); in particular, application is recommended three days before surgery
- in cases of inflammatory diseases of the cornea (keratitis) and conjunctiva (conjunctivitis), including those of infectious origin (from bacteria, viruses, fungi)
- in antibiotic therapy, in both adults and children
- in cases of abrasions, corneal trauma, use of contact lenses
- in cases of alterations of the ocular surface due to instability of the tear film, also in patients with recurrent eye infections.

Directions for use

Shake the bottle before use.

Instil one or two drops in each eye, one or more times a day or as advised by your doctor.

The product can be used while wearing contact lenses.

Composition

LipozonEye (ozonated sunflower seed oil, soy phospholipids) hydroxypropyl methylcellulose, boric acid, sodium tetraborate, sodium edetate, PHMB, purified water.

Warnings

- Wash your hands thoroughly before using the product.
- Do not use the product if you are allergic or have a known hypersensitivity to any of the components.
- Close the bottle tightly after each use.
- Do not use the product after 28 days from opening.
- Do not use the product after the expiry date indicated on the bottle.
- Store the product at a temperature between 8 and 25° C.
- Keep out of the reach of children.
- Do not ingest.
- Do not use the product if the packaging does not appear intact.
- Should any adverse reaction occur, discontinue use and consult your doctor.
- Make sure that the tip of the bottle does not come into contact with the eye.
- Administer the product at least 5 minutes before or after the administration of other products for topical ophthalmic use.
- A slight variation in the opalescence of the ophthalmic solution does not represent an alteration of the quality of the product.
