

Vi3[®]

20 EFFERVESCENT
SACHETS

GLUTEN FREE

Net weight **130 g e**

Food supplement made of **hydrolysed collagen, sodium hyaluronate, turmeric (Cureit[®]), N-acetylcysteine, carnitine, vitamin C and minerals (magnesium and zinc).**
With sweeteners and sugar (fructose).

Collagen and hyaluronic acid

The vitreous body is made up of water (about 99%) and is rich in hyaluronic acid, produced by cells which are called hyalocytes. Collagen and hyaluronic acid constitute the organic fraction, with structural function, of the vitreous body. The collagen fibres are immersed in a matrix of hyaluronic acid, which allows a sufficient separation among them, so as to ensure adequate transparency. The structure of the vitreous gel, also due to oxidative stress, age and/or particular conditions, can undergo some alterations (for example the collagen fibres can come into contact and join each other), with a consequent loss of part of transparency and the formation of vitreous opacities. It is, therefore, very important to preserve the integrity of the relations between the collagen and hyaluronic acid molecules.

Turmeric

Turmeric is a natural substance obtained from the dried rhizome of **Curcuma longa**, a perennial plant. Cureit[®] is a particular formulation of **Curcuma longa** extract based on a technological system (PNS) that allows achieving a significantly higher bioavailability in comparison to standard turmeric formulations.

N-Acetylcysteine

N-Acetylcysteine (NAC) is an N-acetyl derivative of the amino acid cysteine.

Carnitine

Carnitine is a conveyor of long-chain fatty acids to the mitochondria to produce ATP which is crucial in the body's various biosynthetic reactions.

Vitamin C

Vitamin C protects cells from oxidative stress and contributes to the physiological formation of collagen for normal blood vessel function.

Zinc

Zinc intervenes in the process of cell division and helps protect cells against oxidative stress and maintain normal eyesight.

Magnesium

Magnesium is a mineral that contributes to maintaining electrolyte balance and normal energy metabolism.

Usage

One sachet per day or in accordance with the doctor's advice, to dissolve in a glass of water (about 200 ml).

Warnings

Do not exceed the daily recommended dose. Keep out of reach of children under three years. Supplements should not be used as a substitute for a varied, balanced diet and a healthy lifestyle. Do not take in case of hypersensitivity or allergies to one or more components. Product for adults, not intended for adolescents and children from 3 years of age. In case of liver or biliary function changes or gallbladder stones, the use of the product is not recommended. Do not use during pregnancy and lactation. Do not use for prolonged periods without consulting your doctor. If you are taking medications, you should consult a doctor.

Storage

Store in a cool and dry place, away from light and/or heat sources. The minimum conservation period refers to the product properly stored, in undamaged packaging.

Format

Package with 20 effervescent sachets.
