

RETIZIN[®]

ANGIO

Food supplement containing vitamins, mineral salts, Cureit[®], SAC30+TM, Homotaurine and FloraGLO[®].

RETIZIN[®] ANGIO is a food supplement containing turmeric (Cureit[®]), Allium sativum extract titrated in S-allylcysteine (SAC30+TM), homotaurine, lutein (from FloraGLO[®]), vitamins and minerals recommended in case of a reduction within the diet or increased needs. An unvaried and unbalanced diet, together with unhealthy lifestyle choices or increased personal needs, can result in an inadequate intake of components or a non-physiological level of substances that contribute to the protection of cells against oxidative stress.

Turmeric - Cureit[®]

Turmeric is a natural substance obtained from the dried rhizome of Curcuma longa, a perennial plant. Cureit[®] is a particular formulation of Curcuma longa extract based on a technological system (PNS) that allows achieving a significantly higher bioavailability in comparison to standard turmeric formulations.

Dry extract of Allium sativum (SAC30+TM)

The dry extract of Allium sativum - SAC30+TM, titrated in S-allylcysteine, has an antioxidant function and is able to regulate the function of the cardiovascular system.

Homotaurine

Homotaurine is a synthetic amino acid derivative, existing in nature in particular species of algae.

Lutein and Zeaxanthin

They are molecules called carotenoids, which accumulate in the central part of the retina, the macula lutea. The Tagetes erecta extract titrated in lutein contributes to eyesight well-being.

Folic acid

Folic acid is a water-soluble B group vitamin, useful for normal homocysteine metabolism; it also intervenes in the processes of cell division and contributes to normal psychological function.

Vitamin C and Vitamin E

Vitamins C and E protect the cells against oxidative stress.

Vitamin D3

Vitamin D3 intervenes in the process of cell division.

Copper - Zinc

Copper and zinc are minerals which contribute to the protection of cells against oxidative damage; moreover, copper is useful for normal energy-yielding metabolism and zinc contributes to maintaining normal vision.

Usage

We recommend one tablet per day, to be swallowed whole with a sip of water.

Warnings

Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Do not exceed the recommended daily dose. Keep out of reach of children under three years. Product for adults. In case of liver function changes, biliary or gallbladder stones, the use of the product is not recommended. Do not use during pregnancy and lactation. Do not use for prolonged periods without consulting a doctor. If you are taking medications, you should consult a doctor. Do not take in case of hypersensitivity or allergies to one or more components.

Storage

Store in a cool and dry place, away from light and/or heat sources. The minimum shelf life refers to the product properly stored, in undamaged packaging.

Format

Package with 28 swallowable gastro-resistant GLUTEN-FREE tablets.
