

AsekOfta™

20 x 3.7 g stick packs

Net weight **74 g**

GLUTEN FREE

Food supplement with microencapsulated DHA powder, Polygonum cuspidatum dry extract, N-Acetylcysteine, Methylcobalamin, vitamins and minerals. With sweetener.

Microencapsulated Omega 3 titrated in DHA

These are essential polyunsaturated fatty acids, classified as such because the body cannot synthesize them, which is why they must be introduced through the diet or food supplements.

An intake of 250 mg of Docosahexaenoic acid (DHA) contributes to the maintenance of normal vision and normal brain function.

Polygonum cuspidatum

It is a perennial plant, among the major natural sources of the glucoside polydatin. It has antioxidant properties.

N-Acetylcysteine (NAC)

It is an N-acetylated derivative of the amino acid cysteine that acts as a precursor to glutathione, a powerful antioxidant in the body.

Methylcobalamin

It is the biochemical form of high-absorption Vitamin B12. Methylcobalamin intervenes in the process of cell division, supports the normal metabolism of homocysteine and the normal functioning of the nervous system.

Riboflavin (Vitamin B2)

It helps maintain normal vision and normal mucous membranes.

Zinc

It helps maintain normal vision and, together with folic acid and Vitamin D, intervenes in the process of cell division.

Copper

It supports normal energy-yielding metabolism and helps protect cells from oxidative stress.

Folic acid

Folate contributes to the normal metabolism of homocysteine and intervenes in the process of cell division.

Usage

We recommend one stick pack per day, to be dissolved in a glass of water.

Warnings

Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Do not exceed the daily recommended dose. Keep out of reach of children under three years of age. Consult your doctor before use. Do not administer to children under three years of age.

Storage

Store in a cool and dry place, away from light and / or heat sources, at a temperature ranging from 8° to 25° C. The minimum shelf life refers to the product properly stored, in undamaged packaging.
